Explanation of Grades:

Star Performer: School districts with more than 50% of entire student body and more than 60% of low-income population participating in both the National School Lunch Program and the School Breakfast Program.

Moving Up: School districts that's low-income student participation in the School Breakfast Program grew more than 50% between school year 2008-09 and 2009-10.

Improvement Needed: School districts with a student body made up of at least 20% low-income students and with less than 60% of those low-income students participating in both the National School Lunch Program and the School Breakfast Program.

Star Performer: School districts not serving breakfast.

There are three reasons why a school district's performance may not have been graded in this year's report card:

No Grade - 1: School districts whose student populations were comprised of less than 20% low income students were not placed in the Improvement Needed category even though their performance would have dictated that they be included. (Hunger Action established the one-in-five low-income student benchmark as a minimum threshold, as the research was focused on evaluating those school districts with a relatively higher percentage of eligible participants for the School Breakfast Program.)

No Grade - 2: School districts with breakfast programs in their first year were not included, as the performance of these districts will be evaluated in the next report card.

No Grade - 3: School districts with less than half of all students participating in both the National School Lunch Program and the School Breakfast Program were not included in Star Performers, even though these school districts did have more than 60% of low income students participating in both meal programs.

Glossary of Terms

National School Lunch Program (NSLP) - a federally assisted meal program operating in public and nonprofit private schools and residential child care institutions, established under the National School Lunch Act (signed by President Harry Truman in 1946). It provides nutritionally balanced, low-cost or free lunches to children each school day.

School Breakfast Program (SBP) - provides cash assistance to states to operate nonprofit breakfast programs in schools and residential childcare institutions. The program is administered at the Federal level by the US Department of Agriculture's Food and Nutrition Service. The Pennsylvania Department of Education administers the SBP at the state level, and local school food authorities (districts)

Student Body - total number of students enrolled in a school district.

Low-Income (LI) - students eligible for free or reduced-priced school meals through the NSLP or SBP.

Average Daily Participation (ADP) - the average number of students in a school district participating in the NSLP or SBP each day.

LI SBP ADP - the average number of low-income students that participate in SBP on a daily basis (per district).

% LI Participating in SBP - the percentage of all low-income students participating in SBP (per district).

SBP to NSLP Ratio - the percentage of students participating in SBP that also participate in NSLP (per district).

LI SBP to NSLP Ratio - the percentage of low-income students eligible that participate in SBP that also participate in NSLP (per district).

of LI Participating in NSLP - the number of low-income students that participate in NSLP but not SBP (per district).

LI Not Participating in SBP - the number of low-income students that do not participate in SBP regardless of whether they participate in NSLP (per district).
